

Computer Requirements

For Telephone Notification System:

Operating System: Windows XP Pro (Vista Business or Vista Ultimate may also be used with PIKA voice boards, but not with Dialogic voice boards.)

Minimum System Requirements: 1.5 GHZ processor, 1 GB of RAM, 40 MB of available hard drive space, Super VGA Monitor, Keyboard, Mouse, and Sound Card. Note: You may need higher speed and more RAM if you have large telephone lists and/or many telephone lines.

PCI or ISA Slot for Voice Board: New PIKA or Dialogic boards fit in either 5 or 3.3 volt PCI slots. The boards are 4.5" high and either 7" or 13" long, depending on the model. Used Dialogic boards use either ISA or PCI slots, depending on the model. More than 1 slot may be needed. Note: Certain Dialogic boards do not support call transfers. (Contact sales if you need more information.)

Surge Protector & Battery Backup: To protect your hardware, software, and data.

Dedicated Use: While dialing, your computer should only be used for the Telephone Notification System.

Recommended: High Speed Internet connection, and to not interfere with performance of the dialer, we recommend that the following are turned off: screen savers, power management, automatic Windows updates, security firewalls, and anti-virus software.

If you purchase our computer:

Clone Computers

Buy any of our software and/or voice boards
and installation into the computer is free.
